### DETAILED ACTION

Previous rejections not mentioned below have been withdrawn.

#### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,2,4,7,10-12,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Motojiuma et al (USPN 4866201; 9/12/89). Motojiuma teaches a method of applying to orchards (fruit trees) a composition comprising instant compounds of formula I. See abstract, column 20 lines 50-63. Motojiuma does not teach an invention comprising citrus fruit trees or an invention comprising increasing amounts of flavonoids and other phenolic compounds. Note that orchards are fruit trees. Also note the step of applying the compound of formula I to the fruit tree in the claim is also carried out by Motojiuma which makes it obvious that the flavonoids and other phenolic compounds would increase in the orchards of Motojiuma.

#### *Claim Objection / Allowable Subject Matter*

Claims 3,9,14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 6 is allowable. The prior art does not teach or suggest the invention comprising grape plants.
